

STORAGE WATER TANKS

Anti-bacterial
4 Layered
with
Heat Reflective
Technology

Specifications

The Ganga... for Life! range of anti-bacterial Water Storage Systems have been designed keeping in view the needs of all kinds of applications - domestic, commercial and industrial. The Water Storage Systems are available in various capacities from 500 to 1,000 litres. Each Ganga... for Life! Tank Water Storage System comes with a 5 year warranty. Every tank is made up of 4 layers, each one serving a very specific purpose. Moreover, every tank goes through strict Quality Control checks before it leaves the plant.

SPECIFICATION	VERTICAL OVERHEAD TANKS		
Capacity (Litres)	500	750	1,000
Overall Diameter (mm)	875	965	1,085
Overall Height (mm)	930	1,195	1,295
Manhole Diameter (mm)	390	390	390

The specifications are subject to change without prior notice.

A RANGE OF
FOUR LAYERED TANKS
IN METALLIC COLOURS,
WITH UNMATCHED
FEATURES!

ANTI-BACTERIAL • FOUR LAYERED • HEAT REFLECTIVE TECHNOLOGY • FOOD GRADE PLASTIC

STORAGE WATER TANKS

Bacteria - A Danger for Plastics

Products made of plastic without protection are exposed to the attack of microbes. Bacteria, yeasts and mould fungi can propagate without limits on all types of polymers.

The increase of micro organisms has unpleasant consequences like odours, soiling and staining which impairs the quality of the materials. As a result, the products lose their functionality, require a higher degree of cleaning, or simply become unsightly. In the worst case, the bacterial attack can destroy the material.

Fungi do lasting damage to polymers by causing typical stains and destroying the material.

Algae require light in order to thrive. Where they exist, unsightly green and red spots form.

Bacteria increases practically everywhere at an enormously rapid rate. Within a very short time, offensive odours arise.

Without Anti Bacterial Treatment

Bacteria attacks and destroys unprotected plastics, which results in the formation of unpleasant odours and the material is destroyed as well.

With Anti Bacterial Treatment

The Anti-bacterial treatment protects plastics permanently against bacterial attack. The formation of unpleasant odours and destruction of the material are permanently prevented.

Performance, Quality & Reliability The Vectus Advantage!

We are fast emerging as the company that innovates to make life easier for you. Whether it is the pipes that we brought and changed the way the people looked at durability, hygiene, aesthetics and value for money in pipes. Each innovation at Vectus has been identified with Performance, Quality and Reliability. No wonder we are the country's fastest growing company in the category of plastic products.

We, at Vectus are committed to manufacture quality plastic products with adherence to the world class standards. We strive through the spirit of teamwork to maximize customer satisfaction through continual improvements at all levels.

Salient features:

- ❖ Rounded edges to avoid stress formation.
- ❖ Computer Aided Design (CAD) incorporating the principles of Finite Element Analysis.
- ❖ Unique Heat Reflective Technology for enhanced durability and avoidance of plastic degradation by sun rays.
- ❖ Inner anti-bacterial layer resistant to all kinds of bacteria, fungi and yeasts - which in turn means:
 - ❖ Increased life of the tank
 - ❖ Odourless water
 - ❖ Better quality of water, which means better health for you & your family.
- ❖ Available in 3 sizes - 500, 750 and 1,000 litres.

5 YEAR WARRANTY

Heat Reflective Technology

Our proprietary Heat Reflective Technology on the outer layer ensures that the water in the tank remains cool as the highly reflective finish of the outer layer reflects most of the sunrays back into the atmosphere. This gives our tanks a much better and long life and also safeguards the polymer structure.

Unique Threaded Lid - a first!

The consumer friendly feature of the tanks is the threaded lid. This ensures that the tank stays tightly screwed shut and sealed for safety and it also enhances the sleek appearance of the tanks. So no more ugly trappings to place on tanks to keep the lid safely and the convenience of opening and shutting the tank with ease.
