

EUROPEAN STANDARD TANKS NOW IN INDIA!

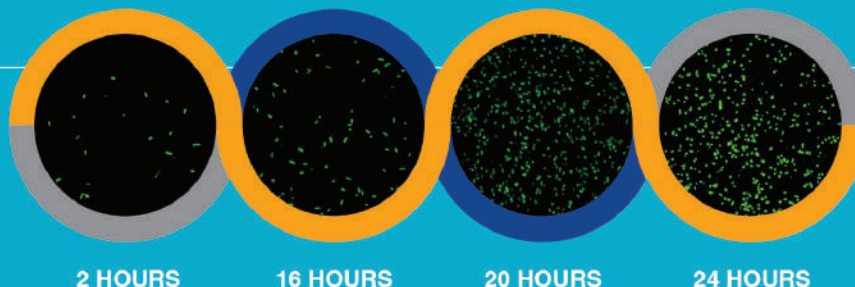

Presenting our new range of **anti-bacterial** and **heavy metal-free** tanks certified as per European Standards!

Safeguard your tank and water from bacteria!

The anti-bacterial tanks ensure that the tank is not contaminated with bacteria. This technology inhibits the ability of bacteria to grow on the surface. Thus, making water suitable for use without any treatment. These range of tanks comes with 5 Years guarantee.

Unprotected Surface

Surface with Anti-bacterial Protection

Without Bacterial Protection

- It will affect the functionality of the tank, infect water and increase the cost of maintenance
- Bacteria destroy the plastic, as a result the quality of the product deteriorates
- Bad odour, soiling and staining of tank

Microban® Protected Surface

Microban technology keeps tanks cleaner, fresher and durable by protecting the tank surface and giving long term protection against bacteria.

Microban® is the global leader in anti-microbial, odour control, and surface modification technologies. Its proactive systems keep products cleaner, fresher and more durable by preventing problems before they start.

Various pigments used in the making of tanks are extracted naturally and usually contains traces of hazardous heavy metals which are unsafe for human consumption. This makes water toxic and causes harm to the body. But our tanks are **certified as per (Restriction of Hazardous substance) RoHS Directive** (European Union) 2015/863 which ensure,

- Tanks are free of heavy metal, without compromising on strength and durability of the tank.
- Keeps water safe for drinking purposes
- Made as per International high quality standards and safety guidelines; one can be rest assured of family's well-being.

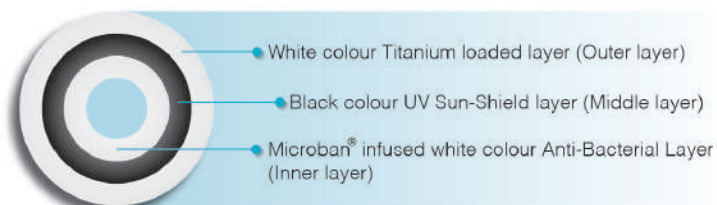

The new Vectus Safe range of Anti-Bacterial water storage tanks has been designed keeping in mind the good health of your family. This tank is free from hazardous heavy metals which keeps water safe for human consumption. It is made up of 3 layers, each one serving a very specific purpose. Ideal for household and industrial applications.

Salient Features

-  The Inner **Anti-Bacterial layer** infused with Microban® anti-bacterial technology, which eliminates bacteria by 99.9%.
-  Intermittent black colour **UV Sun-shield layer** which protects water tank from harmful UV rays.
-  Outer high quality **Titanium loaded layer** which gives strength and whiteness to the tank.
-  Free from Hazardous heavy metals as per the European Standards which make water safe for drinking purpose.
