

The assurance of purity & health!

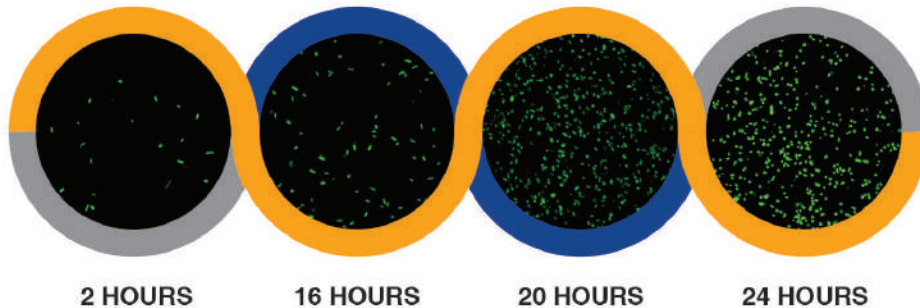

Presenting our new range of **anti-bacterial** and **heavy metal-free** tanks certified as per European Standards!

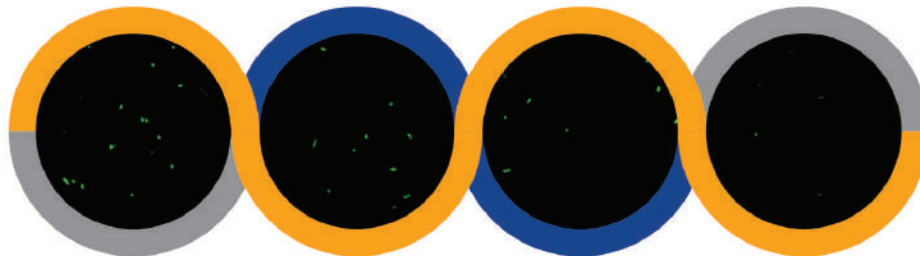

Safeguard your tank and water from bacteria!

The anti-bacterial layer ensures that the tank is not contaminated with bacteria. This technology inhibits the ability of bacteria to grow on the surface. Thus, making water safe for human consumption. These range of tanks comes with 5 Years guarantee.

Unprotected Surface

Surface with Anti-bacterial Protection

Without Microban®

- Affects the functionality of the tank, infects water and increases the cost of maintenance
- Bacteria destroy the plastic, as a result the quality of the product deteriorates
- Bad odour, soiling and staining of tank

Microban® Protected Surface

Microban technology keeps tanks cleaner, fresher and durable by protecting the tank surface and giving long term protection against bacteria.

Various pigments used in the making of tanks are extracted naturally and usually contain traces of hazardous heavy metals which are unsafe for human consumption. This makes water toxic and causes harm to the body. Therefore, our tanks have been **certified as per (Restriction of Hazardous substance) RoHS Directive (European Union) 2015/863** which ensures,

- Tanks are free of heavy metal, without compromising on strength and durability of the tank.
- Keeps water safe for drinking purpose.
- International high quality standards and safety guidelines give peace of the mind.

Ganga[®] Health

The new Ganga Health range of Anti-Bacterial water storage tanks has been designed keeping in mind the good health of your family. This tank is free from hazardous heavy metal which keeps water safe for human consumption. It is made up of 3 layers, each one serving a very specific purpose. Ideal for household and industrial applications.

Salient Features

-  The Inner **Anti-Bacterial layer** infused with Microban[®] anti-bacterial technology, which eliminates bacteria by 99.9%.
-  Intermittent black colour **UV Sun-shield layer** protects it from harmful UV rays.
-  Outer high quality **Titanium loaded layer** gives strength and whiteness to the tank.
-  Free from Hazardous heavy metals as per the European standards which makes water safe for drinking purpose.

Cross-section of 'Ganga Health 3 Layer' Water Tank

- White colour Titanium loaded layer (Outer layer)
- Black Colour UV Sun-Shield layer (Middle layer)
- Microban[®] infused white colour Anti-Bacterial layer (Inner layer)

Ganga[®]cool

The Ganga Cool range of Anti-Bacterial water storage tanks has been designed to keep your water pure, safe and cool. These tanks consist of 4 layers, each one serving a very specific purpose. Ideal for household and industrial applications.
