Vectus Plastic Manhole Cover vs. Traditional Cover

Traditional Cover

Vectus Plastic Manhole Chamber Cover

- Traditional Manhole Covers are made up of traditional material which are very heavy to handle while Vectus Manhole Covers are made up of virgin plastic material on which you can rely upon and is also very light in weight.
- Traditional Manhole Covers installation are labour intensive and uses heavier equipment to handle/ transport them from one place to another which increases the cost of installation as well as time, on the contrary Vectus Plastic Chamber Covers are easy to install and require less labour hence cost effective. These manhole covers has good load carrying capacity.

Guidelines for Installation and framing of Vectus Plastic manhole chamber cover

- The Top level of the frame should match road height
- Prepare concrete bed considering height of the frame
- Allow frame to set in concrete for minimum time of 48 hrs.
- Frame has to be supported from all four sides equally
